**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a node or line terminal including a test signal generator, classified in class 359, subclass 110.
  - II. Claims 12-17, drawn to nodes with transponders and loopback mechanisms, classified in class 359, subclass 176.
  - III. Claims 18-29, drawn to a node with a multiplexer/demultiplexer, classified in class 359, subclass 124.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are generally related to nodes in an optical network but have different functions.

Group I is directed to a system wherein a node or line terminal includes a test signal generator for transmitting a test signal to a monitoring circuit to test a light path. However, the node of Group I does not require a loopback path as in Group II or III, or a multiplexer/demultiplexer as in Group III.

Group II is directed to nodes with transponders and loopback mechanisms, either singly or networked together, but does not require the test signal generator of Group I or the multiplexer/demultiplexer of Group III.

Group III appears to be directed to a node with a multiplexer/demultiplexer and loopback means (Examiner notes that claim 24 does not have a preamble). However, the node of Group III does not require a transponder as in Group II or III, and again, neither Groups I or II require a multiplexer/demultiplexer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Groups I, II, and III is not required for the others, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
